

Study: Complete Record Linkage Tasks

The task is to identify data records that refer to the same real world person.
Example: Link two hospital databases to find patients that have visited both hospitals .

Your job during the study will be **to look at pairs of records about people** and **determine the likelihood that the pair refers to the same real world person.**

Pair	ID	First name	Last name	DoB (M/D/Y)	Sex	Race
1	8000002767	JUDE	WILLIAM	09/09/1906	M	W
	8000003567	JUDE	WILLIAM JR	09/09/1960	M	B
2	0000006947	BRYANT	MADELINE	05/02/1962	F	W
	0000006947	MADELINE	BRYANT	05/02/1962	F	W
3	9000018540	SALLY	BYRD	07/04/1960	F	W
	6000008928	JOHN	BYRD	04/07/1960	M	

Common Issues in Real Data

Learn and watch out for common issues in data the during record linkage task

Data are expressed differently

- Nick Names (Elizabeth & Beth)

Data change over time

- Women get married and change their last name

Data are not unique attributes

- John Smith (there are different people that have the same name)
- Twins & Family members have similar identifying information such as DOB & last name

Data are sometimes missing

- SSN are often missing

Data have errors

- Inserting/deleting extra characters
- Typing in the wrong character
- Transposing two characters
- First name and last name are mixed up
- Day and month is mixed up

Missing ?

Data are sometimes missing.

7	0000018335	...	PATSY	CALLAHAN	...	11/13/1948	F	B
	?	...	PATSY	CALLAHAN	...	?	F	B

Insertions & Deletions +

Insertion (or deletion) of characters are common typing errors

1	8000001276	①	JAYDEN	TIPTON	∞	09/09/1960	M	W
	8000002768	①	JADEN	TIPTON	∞	09/09/1960	M	W

Replace

Mistyping can lead to certain characters replacing others

3	9000018540	①	SAL	BYRD	...	04/07/1960	F	W
	9000018870	①	SAL	BIRD	①	04/09/1960	F	W

Transpose

Two characters can be interchanged by mistake

11	1719582520	①	ROGRES	HYLEMON	...	07/15/1924	M	W
	1719852520	①	ROGERS	HYLEMON	...	07/15/1942	M	W

Swaps

Due to mix up, sometimes whole values are swapped as well

Date Swaps

9	0000020502	...	SAMANTHA	MORGAN	...	02/11/1958	F	W
	0000020502	...	SAMANTHA	MORGAN	...	11/02/1958	F	W

Name Swaps

5	0000006947	①	BRYANT	MADLINE	①	09/22/1926	F	W
	0000006947	25	MADLINE	BRYANT	...	09/22/1926	F	W

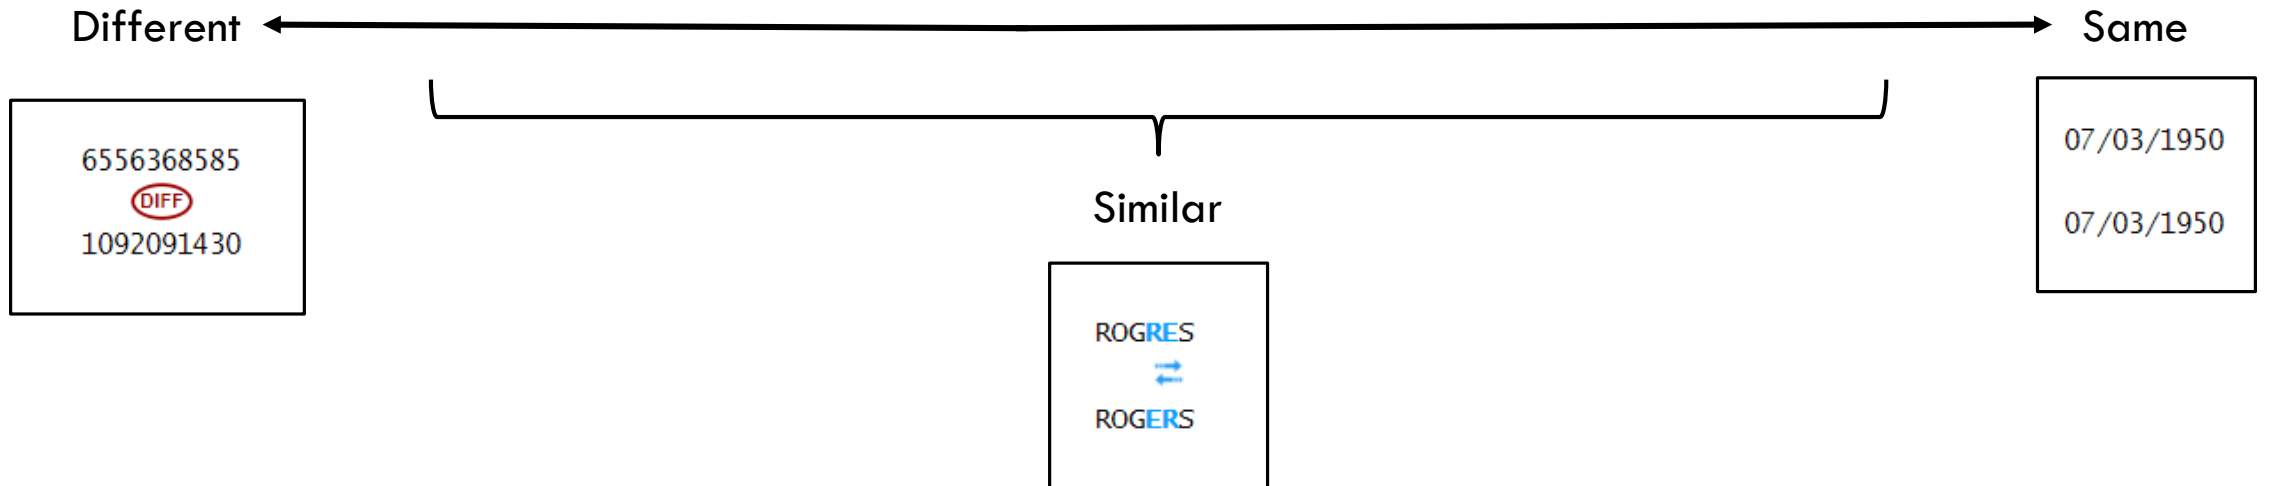

Different

Sometimes the values are different

13	6556368585	①	WILL	GREENE	...	07/03/1950	M	B
	1092091430	①	DAVE	GREENE	...	07/03/1950	M	W

Roughly, **think of the similarity of 2 values being in a continuum**. On one end, we have values that are very different and on the other end, we have values that are exactly the same. Values with a few operations (like transpose, insert, replace etc.) fall in between.

The Decision Making Process

The answer to a record linkage problem is not a simple yes or no. It is a process that requires you to **think in terms of chances**. Let's take an example:

1	1489599505		JOHNATHON	BUCKNER	...	02/15/1989	M	W
	1489599505		JONATHON	BUCKNER	...	02/15/1989	M	W

Asking “Do these 2 records refer to the same person?” is approaching it wrong.

The question to ask is “**What are the chances that 2 records with the same information in all fields except the first name which is pretty similar, refer to the same person?**”.

You still cannot be 100% sure that they refer to the same person but the chances are pretty high.

Michelle Williams ?

Name Frequency

How common or unique a given name is important information you can use.

Intuitively, two **common names** might often refer to **different people** while two **rare names** often refer to the **same person**

Frequency Icons indicate how many times a given name occurred in the source data

How to do a Record Linkage Task

Pair	ID	FFreq	First name	Last name	LFreq	DoB (M/D/Y)	Sex	Race	Choice Panel
1	8000002767 ✗	①	JUDE	WILLIAM	①	09/09/1906	M	W	
	8000003567	①	JUDE	WILLIAM JR. +	①	09/09/1960	M	B DIFF	
2	0000006947	①	BRYANT	MADELINE	①	05/02/1962	F	W	
	0000006947	2 5	MADELINE	BRYANT	...	05/02/1962	F	W	
3	9000018540 DIFF	...	SALLY	BYRD	...	07/04/1960	F DIFF	W	
	6000008928	∞	JOHN	BYRD	...	04/07/1960	M	?	

The Response Panel

You should answer if you think the given pair

- Refers to the **same person** (pick one of L, M, H on the right depending on your confidence level)
- OR refers to two **different people** (pick one of L, M, H on the left depending on your confidence level)

Ready to Give it a try?

Let's do some Practice Problems

Now let's try to learn how to apply these concepts to make good record linkage decisions through some practice problems

Ready?

Click on button below to confirm you have gone through all the slides, and the next button to move onto the practice problems.
